Ruoyu Wang

E-mail: ruoyuwang@mail.tsinghua.edu.cn | Phone Number: +86 18722291696
Personal Website: https://ryw-stats.github.io
Address: Room 807B, Lyu Dalong Building, Tsinghua University,
Beijing, China, 100084

Education

Ph.D in Probability and Mathematical Statistics — Sept, 2017 – Jun, 2022
Academy of Mathematics and Systems Science (AMSS),Chinese Academy of Sciences — *Beijing, China*

Bachelor in Statistics — Sept, 2013 – Jun, 2017
Nankai University — *Tianjin, China*

Work Experience

Assistant Professor — Sept, 2026 – Present
Department of Statistics and Data Science, Tsinghua University — *Beijing, China*

Postdoctoral Fellow — Sept, 2022 – Aug, 2026
Department of Biostatistics, Harvard University — *Boston, United States*
Advisor: Xihong Lin

Research Areas

- Data Fusion
- Causal Identification and Inference
- Mendelian Randomization
- Large-scale Data Analysis
- Two-phase Sampling
- Machine Learning Theory

Peer-Reviewed Publications

Awards

• 2021.9	AMSS	**President Scholarship, Grand Prize**
• 2021.5	AMSS	**Merit Student**
• 2020.5	AMSS	**Merit Student**
• 2016.12	Nankai University	**First Prize Scholarship**
• 2015.12	Nankai University	**Merit Student**

Visit

- Department of Statistics, Rutgers University. March, 2025.

Oral Presentations

- Divide-and-shrink: An efficient and heterogeneity-agnostic approach for transfer estimation using summary statistics. **Invited talk**, ICSA Applies Statistics Symposium, June 2026.
- Denoising data with measurement error using a reproducing kernel-based diffusion model. **Invited talk**, International Joint Conference CFE-CMStatistics, December 2025.
- Causal effect identification and inference with endogenous exposures and a light-tailed error. **Invited talk**, International Conference on Econometrics and Statistics, August 2025.
- Divide-and-shrink: An efficient and heterogeneity-agnostic approach for transfer estimation using summary statistics. **Invited talk**, Diabetes StatClin Meeting, April 2025.
- Divide-and-shrink: a heterogeneity-agnostic approach for safe data integration. **Invited talk**, IMS-China 2024, July 2024.

- Extreme-based causal effect learning with endogenous exposures and a light-tailed error. **Invited talk**, 2024 International Conference on Frontiers of Data Science, July 2024.
- Debiased Estimating Equation Method for Versatile and Efficient Mendelian Randomization Using Large Numbers of Correlated Weak and Invalid Instruments. **Invited talk**, The 2nd Joint Conference on Statistics and Data Science in China, July 2024.
- Debiased estimating equation method for summary statistics-based Mendelian randomization. **Invited talk**, The 1st Joint Conference on Statistics and Data Science in China, July 2023.
- A maximin optimal approach for sampling designs in two-phase studies. **Topic-contributed paper session**, Joint Statistical Meetings (JSM), August 2025.
- Divide-and-shrink: An efficient and heterogeneity-agnostic approach for transfer estimation using summary statistics. 2026 Joint Statistical Meeting (JSM), August 2026.
- Extreme-based causal effect learning with endogenous exposures and a light-tailed error. Seminar of Center for Causal Inference, University of Pennsylvania, March 2025.
- Debiased Estimating Equation Method for Versatile and Efficient Mendelian Randomization. 2024 Joint Statistical Meetings (JSM), August 2024.
- DEEM: A Flexible and Efficient Method for Summary Statistics-based Mendelian Randomization. ENAR 2024 Spring Meeting, March 2024.
- Sharp bounds for variance of the treatment effect estimators in finite population in the presence of covariates. The 2021 International Workshop on Statistical Theory and Related Fields (STARF 2021), December 2021.
- Characterization of excess risk for locally strongly convex population risk. Chinese Association for Applied Statistics (CAAS), High Dimensional Statistics Symposium, July 2021.

SERVICE

- Advanced Statistical and Machine Learning Methods for Analyzing Real World Data. **Session chair, ICSA Applies Statistics Symposium, Arlington, VA, 2026.**
- Techniques and Case Studies to Address Missing Data Complications in Scientific Studies. **Session chair, Joint Statistical Meeting, Portland, OR, 2024.**
